Our ergonomic
lift trolley
for all kind of
service work

Reducing manual handling

Lift&Drive, service trolley - suited for all kind of service work

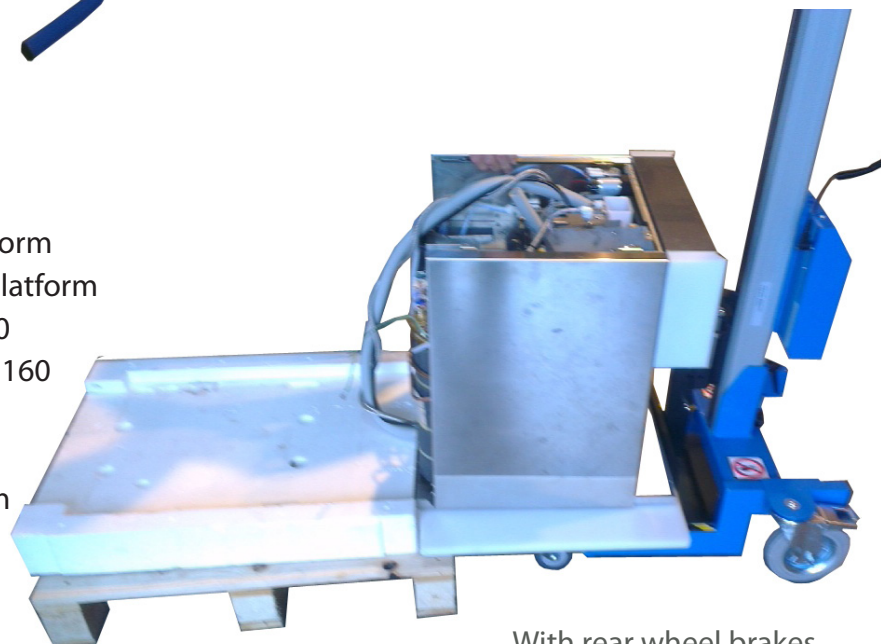

This is a battery operated lightweight and flexible lift trolley, designed for easy lifting and transporting of all kind of items. Installations and removing of coffee machines, batteries and for transferring other heavy equipment. This diverse product is suited to any job where traditional bend and lift is required. The load platform is electrical adjustable in height and controlled by a hand control, which is detachable from the holder that sits on the handle. The handle can easily be raised or lowered, to best suit the user. Designed to improve working efficiencies, boost productivity and meet Health & Safety Executive requirements, by providing ergonomic solutions to reducing the risk of injury's in the work place.

With the large rear wheels the service trolley works like a sack truck. You simply lean the trolley back on the large rear wheels and drive the trolley easily on the rear wheel. This Lift&Drive, service trolley is easy to dismantle in 3 parts, to transport into a Van or Car (vehicle charger inc).

Properties

Total height:	1676
